AICTE – EDUSKILLS VIRTUAL INTERNSHIP

AI Deployment and automation

INTERNSHIP REPORT

An 8-Week Professional Internship Presentation Report

Artificial Intelligence and

Machine Learning

INTERNSHIP DURATION

An Internship Learning Report

INTERNSHIP DURATION

June 2026 – August 2026 (8 Weeks)

20 July 2026 – 19 August 2026 (1 Month)

STUDENT CREDENTIALS

Roll No.

25SCS1003002537

Program & Semester

B.Tech (CSE) • 3rd

HOST ORGANIZATION

Codec Technologies

Candidate & Internship Overview

Candidate Details

Student Name: AVINASH YADAV

Roll Number: 25SCS1003002537

Degree: B.Tech (Computer Science & Engineering)

Semester: 3rd Semester

Session: 2025-29

Internship Profile

InternshipTopic: Artificial Intelligence and Machine

DLeasrignninagtion: Artificial Intelligence Intern

Organisation: Codec Technologies

Duration: 20/07/2026 – 19/08/2026

Mode: Pan India, Hybrid

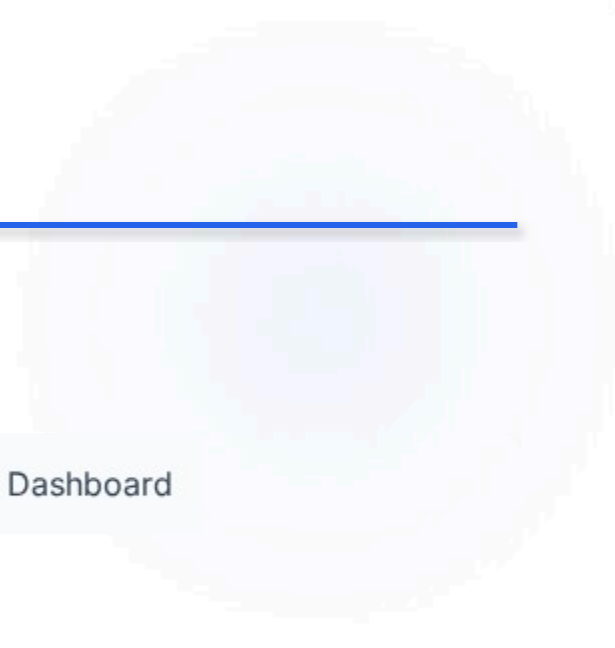

Organisation Profile: Codec Technologies

Codec Technologies is the organisation through which the internship was offered. It is described in the offer letter as a global platform focused on empowering learners and connecting diverse talent with career opportunities.

 **Global Reach:** The offer letter states that Codec Technologies provides IT and business consultancy services across more than 27 countries.

 **Internship Role:** The internship was offered for the role of Artificial Intelligence Intern.

 **Mode & Duration:** Pan India, Hybrid mode, from 20/07/2026 to 19/08/2026.

 Robotic Process Automation and AI Dashboard

Problem Statement & Internship Context

⚠ The Learning Challenge

A major challenge for students learning Artificial Intelligence and Machine Learning is moving from theoretical concepts to practical implementation. Understanding algorithms alone is not sufficient.

An effective AI/ML workflow also requires data preparation, implementation, evaluation, interpretation and documentation.

🎯 The Internship Scope

The internship addressed the need to gain practical exposure to AI/ML-oriented problem solving and to understand how concepts studied in coursework can be applied in structured technical tasks and projects. The focus was on practical learning rather than claiming deployment of an AI system in a live production environment.

Internship Objectives

AI/ML Fundamentals

Strengthen fundamental knowledge of Artificial Intelligence and Machine Learning.

Practical Exposure

Gain practical exposure through assignments, exercises and project-oriented activities.

Data & Evaluation

Understand data preparation, model-building concepts and evaluation at a practical level.

Python & Documentation

Improve Python and problem-solving skills and develop technical documentation.

Technologies & Learning Areas

Programming

Python-programming and implementation of AI/ML exercises.

Problem Solving & Analysis

Analytical thinking and structured approaches to AI/ML tasks.

Supervised and unsupervised learning concepts and workflows.

Data Processing

Preparing and understanding datasets before model

Model development

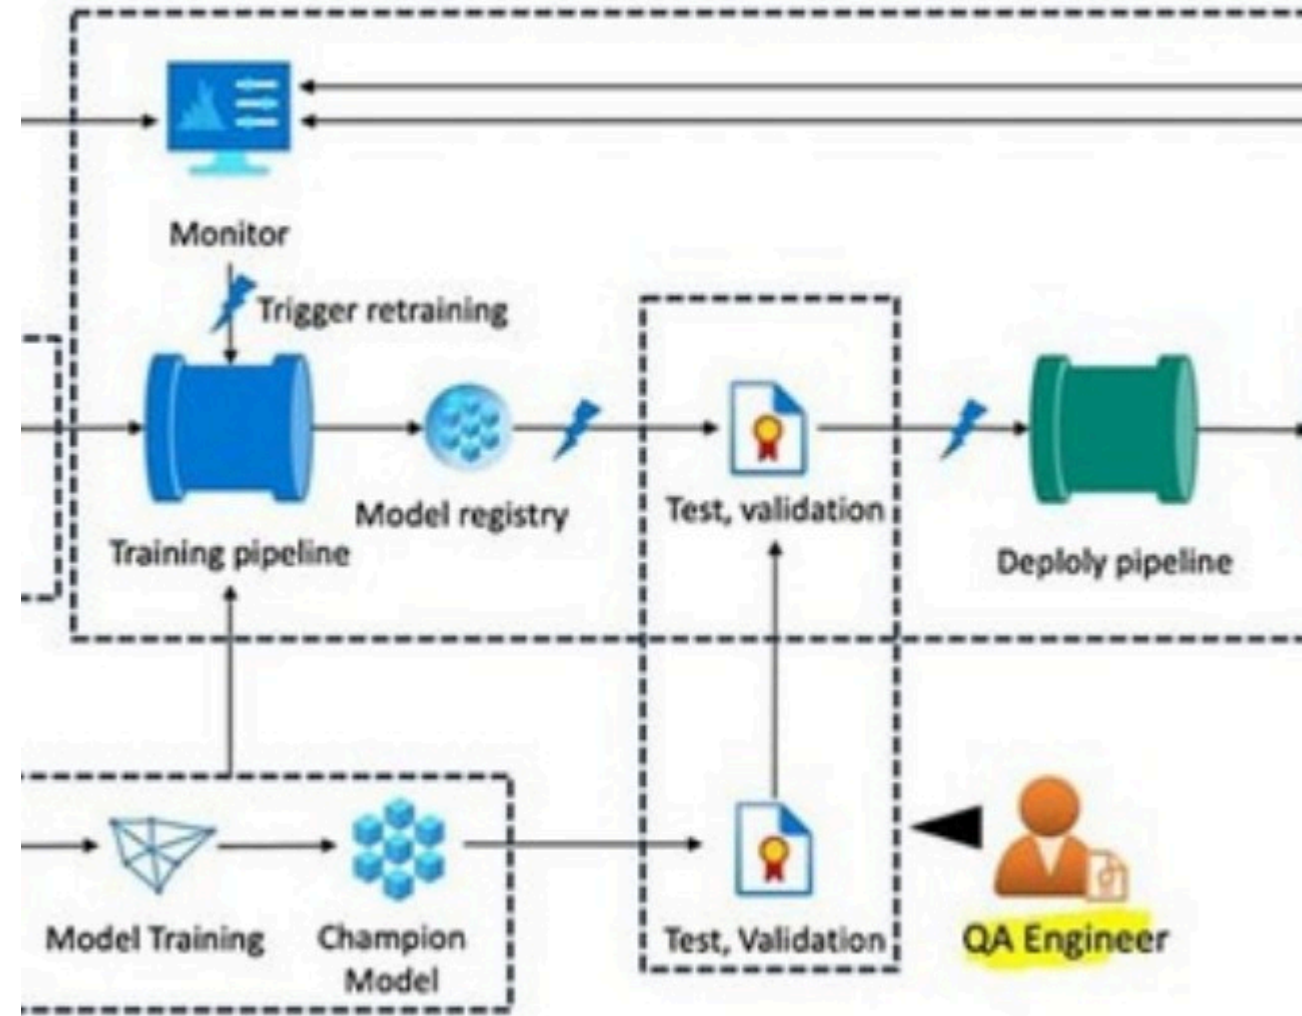

Testing and evaluating model results.

Documentation

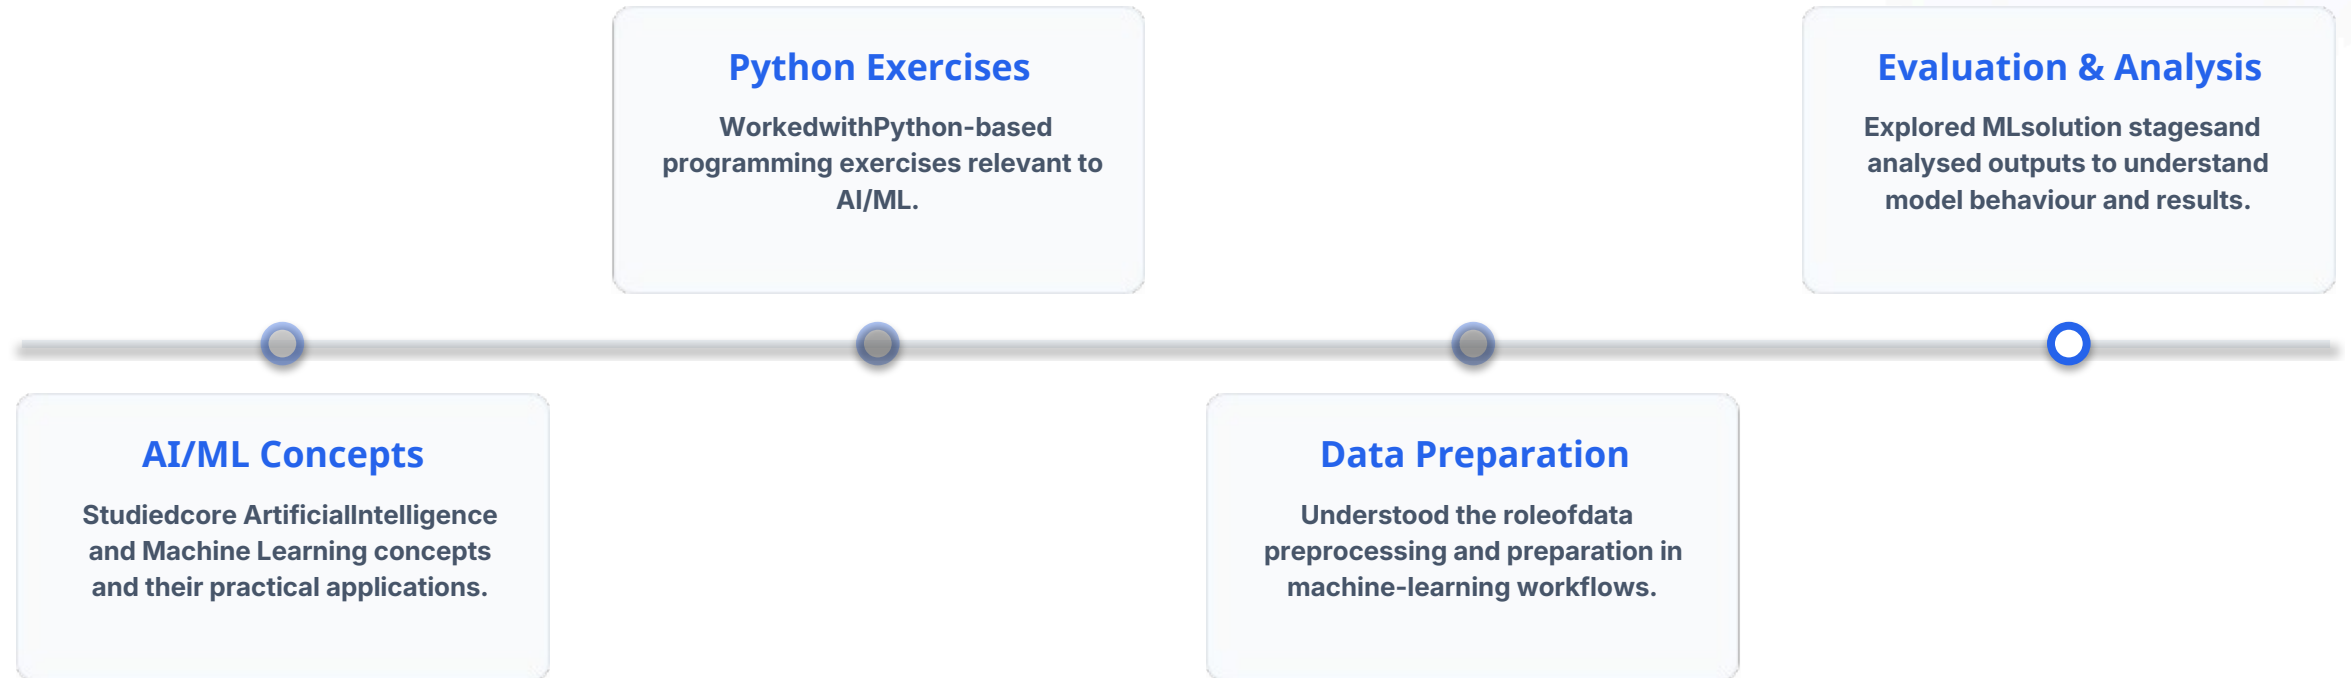

Recording methods, observations, results and learning outcomes.

Internship Methodology

-  Step 1: Understand the AI/ML problem and requirements.
-  Step 2: Study the relevant concepts and approach.
-  Step 3: Prepare and inspect the required data.
-  Step 4: Implement the selected AI/ML approach.
-  Step 5: Test, evaluate results and document observations.
- Step 6: Analyse outputs and record learning outcomes.

Work Performed During Internship

Learning Through Practical Activities

AI/ML Workflow

Understood the stages involved in developing and evaluating an ML solution.

Academic Connection

Bridged classroom learning with practical AI/ML problem-solving.

Technical Documentation

Prepared technical notes and documentation for completed internship activities.

Problem-Solving

Improved structured technical problem-solving through practical learning activities.

Key Projects & Demonstrated Skills

- ✓ **Learning Outcomes & Key Takeaways**
- ✓ **Better understanding of AI and ML terminology and fundamental concepts.**
- ✓ **Improved programming and logical problem-solving practice for AI/ML tasks.**
- ✓ **Understanding of the importance of data quality and preparation.**
- ✓ **Familiarity with the AI/ML workflow from problem definition to evaluation.**

Improved ability to document technical work and communicate results.

Internship Certificate & Official Verification

Verification Metric	Official Record / Credential Details
Internship Topic	Artificial Intelligence and Machine Learning
Issuing Organization	Codec Technologies Pvt. Ltd.
Internship Designation	Artificial Intelligence Intern
Duration	20/07/2026 to 19/08/2026 (1 Month)
Mode / Location	Pan India, Hybrid
Cer tific ate	AICTE & ICAC Approved Internship Certificate

Thank You!

Avinash Yadav
